**IMPORTANT**: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

**Comments:**

On August 12, 2024, fellow Habitat Biologist Beth Evers and I hiked to the site from the High Gold camp. Using an LR-24 backpack electrofisher and dip net, we netted 3 juvenile coho salmon (FL=54, 58, and 59 mm) and several Dolly Varden (FL range 55-100 mm) with an undetermined life history. Coordinates (Lat,Long): Upper(60.091739,-152.910064) Lower(60.092047,-152.909884)
