This certifies that in my best professional judgment and belief the above information is evidence that this waterbody should be included in or deleted from the Anadromous Waters Catalog.

**Observations in this nomination also provide supporting information for Sockeye salmon present up to the new upper extent of existing AWC Stream #212-20-10080-2159 "Tasnuna River", however only one (1) individual was observed which does not meet the minimum requirement to add or update species in the AWC.
