113-59-10070 Tributary 4

ADDITION

Water body name:

Quad: Sitka C-4

Upper Reach Latitude: 57.595250 **Longitude:** -135.091901

Lower Reach Latitude: 57.589618 **Longitude:** -135.080920

Survey date: 8/6/2023

Species & Lifestage:

Survey crew: DK, NJ

Findings: We surveyed this uncataloged stream using a backpack electrofisher and GPS and visually identified juvenile coho salmon and Dolly Varden. No pictures of coho salmon were taken due to so many being visually identified in the stream. Gravels and spawning substrate are scattered throughout the channel, with intermittent woody debris and gravel mounds created by sediment accumulation (Table 1; Figures 1, 2). The survey ended at waypoint 607 due to time, but fish habitat likely continues upstream; future investigation is recommended.

Recommendations: Add this uncataloged stream to the anadromous waters catalog for rearing coho salmon up to waypoint 607 (Figure 3).

Nomination: Pending

Table 1.—113-59-10070 tributary 4 survey data.

Waypoint	Latitude	Longitude	Notes	Stream Width ft	Stream Substrate	Habitat Features	Gradient %	Sample Effort	Sample Results
592	57.590012	-135.081446	Bridge removed and pulled back, hundreds of young of the year coho throughout channel.	15-20	Small Gravel Large Gravel	Spawning Substrate	1-2	HN	3 CO 1 DV
594	57.589696	-135.081017	Confluence with main.
