Comments:

I used two baited minnow traps to capture about 40 juvenile coho salmon in Kekur Creek. Over 500 additional juvenile coho salmon were observed throughout pool habitat in the creek. Additional rearing habitat was located upstream of the upper extent of documented coho presence. The upper trap was located at 57.84987, -152.78981. Please add the local name "Kekur Creek" to the AWC.
