Alaska Department of Fish and Game

Habitat Section Southeast Region

114-31-10130 Tributary 13

Water body name: Quad: Sitka D-5 Upper Reach Latitude: 57.969217 Longitude: -135.442334 Lower Reach Latitude: 57.968789 Longitude: -135.446267

Findings: We surveyed this uncataloged stream using a backpack electrofisher and GPS. We captured juvenile coho salmon, Dolly Varden, and cutthroat trout. Channel erosion at the base of a tree has formed a 3 ft diameter hole, which likely constitutes a temporary barrier to fish passage (Table 1; Figures 1–3).

Recommendations: Add this uncataloged stream to the anadromous waters catalog for rearing coho salmon (Figure 4).

Nomination: Pending

Table 1.–114-31-10130 tributary 13 survey data.
