Habitat Section Southeast Region

112-12-10160 Tributary 1

Waterbody name: Quad: Sitka C-4 Upper Reach Latitude: 57.726579 Longitude: -135.120782 Lower Reach Latitude: 57.729204 Longitude: -135.119175

Findings: We surveyed this uncataloged stream using a backpack electrofisher and a GPS and captured juvenile coho salmon (Figure 1). The stream channel is forested and low gradient throughout the area surveyed (Table 1; Figures 2, 3). We used USFS data to draw the streamline. **Recommendations:** Add this uncataloged stream to the anadromous waters catalog for rearing coho salmon (Figure 4).

Nomination: Pending

Table 1.–112-12-10160 tributary 1 survey data.

With it Substrate Peatures % Eff 1312 57.726307 -135.120823 5' CMP with ~3' gravel 2-4 Small Gravel 2-4 E sediment in pipe at outlet, emptying into small stream with cut banks overgrown with ferns and skunk cabbage. Surveyed via electrofishing for 150' downstream of culvert. ~1- 2' sediment in pipe at inlet. Fine Organic 2-4 E 1313 57.725876 -135.120943 Buried logs in place of crossing structure. Blocks fish passage 2-4 Fine Organic 2-4 E 1314 57.726576 -135.121557 ~6' CMP well-aligned with pipe at inlet and 2-3' at outlet. Surveyed ~100' downstream of outlet; some ~1' falls over rootwads, but still no fish just downstream. Potentially good CO rearing habitat continues downstream. Potentially good CO rearing habitat continues downstream. Upstream follows along ditch. 4-6 Small Gravel 1-2 E 1530 57.726804 -135.121030 Confluence of streams.
