DELETION

**Water body name:** Cathedral Falls Creek

**Survey date:** 6/5/2023

**Quad:** Petersburg D-6

**Species & Lifestage:** CHp, COp, Pp, CTp

**Upper Reach Latitude:** 56.900747 **Longitude:** -133.725215

**Survey crew:** CD, FC

**Lower Reach Latitude:** 56.894638 **Longitude:** -133.742679

**Findings:** We surveyed this cataloged stream up to a FRPA barrier at waypoint 121 (Table 1; Figure 1). The stream is forested, wide, and low gradient up to the falls. We observed pink salmon spawning just downstream of the falls.

**Recommendations:** In the anadromous waters catalog, delete Stream No. 112-42-10160-2021-3003 upstream of the barrier near waypoint 121 to the road where the barrier was previously marked (Figure 2). Add spawning pink salmon to the species and lifestage present.

**Nomination:** Pending

Table 1.—109-42-10090 survey data.

Waypoint	Latitude	Longitude	Notes	Stream Width ft	Stream Substrate	Habitat Features	Gradient %	Sample Effort	Sample Results
121	56.900346	-133.725414	25-30' falls; definite FRPA fish pass barrier. Spawning pink salmon.	30-40	Small Gravel Large Gravel			Not Fished
