Findings: We surveyed this uncataloged stream using a backpack electrofisher, baited minnow traps, and GPS and captured juvenile coho salmon. The stream is narrow with sections that contain iron floc. The upper extent of the stream is in wetland habitat; the channel narrows and flows through disconnected ponds (Table 1; Figures 1–3).

Recommendations: Add this uncataloged stream to the anadromous waters catalog for rearing coho salmon up to waypoint 506 (Figure 4).

Nomination: Pending
