JUSTIFICATION:

The Copper River personal use fishery is managed under direction of the Copper River Personal Use Dip Net Salmon Fishery Management Plan (5 AAC 77.591). The plan establishes the season from June 10 through September 30 and directs the department to establish weekly periods based on Miles Lake sonar counts. During May 26 – June 1, there were 77,340 salmon counted past the Miles Lake sonar. The preseason projection for this period was 67,445 salmon, which results in a surplus of 9,895 salmon. Copper River sockeye salmon migratory timing and the previous three-year average harvest and participation rates indicate sufficient numbers of salmon available to allow 102 hours of fishing time during the week of June 10 – 15, an increase of 18 hours from the preseason schedule.
