Hello my name is —, owner/operator of the _____. I have fished GKC for the last 8 years and worked as a crewman for GKC vessels for more than 18 years before buying my vessel. I think your formula is flawed, examples; 1. Soak time (which you seem to recognize) 2. Square pots vs Cone pots (cone pots can potentially tip over) 3. How big the tides are during the period. 4. Many of us are not using a full 100 pots, like myself, I own 85 pots.

I think you need to allow for a larger increase in the GHJ when it is obvious the stock is on the upswing during this natural and normal downturn in the GKC cycle.

Sincerely,
