

**FISH HABITAT PERMIT FH23-IV-0018-GP**

**ISSUED:** January 1, 2023  
**EXPIRES:** December 31, 2027

General Public:

***Re: Vehicle and Equipment Ford***

**Wolverine Lake Outlet Stream** (Water Body No. 247-50-10220-2080-3019)  
Section 18, T 18 N, R 3 E, SM  
Location: 61.6567 N, 148.9832 W

Alaska law (AS 16.05.871) requires that a permit from the Alaska Department of Fish and Game, Habitat Section be obtained prior to operating wheeled or tracked vehicles in or on the bed, bank, or waters of specified anadromous fish-bearing streams and lakes. In some instances, authorizing specific crossing via general permit (GP) will serve the public interest and provide proper protection of fish and game. Pursuant to AS 16.05.871(d), the Habitat Section has authorized vehicle crossing of the Wolverine Lake outlet stream at the above referenced stream ford location (see attached map).

This GP authorizes stream crossings and the operation of ground contact vehicles on the bed of the Wolverine Lake outlet stream with a dry weight of up to 10,000 pounds. For purposes of this permit, "dry weight" is defined as the weight of the vehicle without passengers and cargo, as specified by the manufacturer. Ground contact vehicles with a dry weight of more than 10,000 pounds are required to obtain an individual Fish Habitat Permit before crossing any anadromous fish bearing waterway. Please contact the Palmer Habitat Section for permit application materials and/or additional information (907) 861-3200.

**This permit does not apply to commercial operators.** Commercial operators who need to conduct equipment or vehicle crossings of anadromous streams must obtain an individual Fish Habitat Permit prior to commencement of operations. Please contact the Palmer Habitat Section for permit application materials and/or additional information (907) 861-3200.

The Wolverine Lake outlet stream (Water Body No. 247-50-10220-2080-3019) has been specified as important for spawning and rearing of coho and sockeye salmon. It also supports a variety of resident fish species such as rainbow trout.

In accordance with AS 16.05.871(d), the movement of wheeled or tracked vehicles on the bed and banks at the stream ford listed above is authorized subject to the following stipulations:

1. **This permit must be in your possession during stream crossings.**
2. **Crossings shall be made at posted locations only.** In the event posted signs have been removed or destroyed, crossings shall be made on established trails at the coordinates listed above.
3. **Stream crossings shall be made as directly as possible.** This is usually perpendicular to the

flow of the water. However, the Habitat Section is aware that the safest route across a stream may not be perpendicular to the flow. Because of this, non-perpendicular crossings may be necessary for safety and are allowed when appropriate.

4. **Vehicle operations within streams shall be limited to that necessary to safely cross the water body.** Driving a vehicle up and downstream for any other purpose, including general recreation, is strictly prohibited.
5. **Vehicles may not linger or delay while crossing streams.** Washing mud from vehicles while the vehicle is in the flowing waters of a stream is prohibited.
6. **Ground contact vehicles shall not be parked below the ordinary high water line of any anadromous stream.**
7. **The bed or banks of this specified water body shall not be altered or disturbed in any way to facilitate stream crossings.** Existing fords shall not be modified, expanded, repaired, or otherwise changed without the prior written approval of the Habitat Section.

**Please be reminded that harassing fish while crossing any stream is prohibited by state law (5 AAC 75.060).**

**This permit does not authorize access across private property to gain access to an anadromous river or stream.** It is the responsibility of the applicant/permit holder to obtain lawful permission from the property owner to access private property.

This letter constitutes a permit issued under the authority of AS 16.05.871 and must be retained on site during project activities. Please be advised that this determination applies only to Habitat Section regulated activities; other agencies also may have jurisdiction under their respective authorities. This determination does not relieve you of your responsibility to secure other permits; state, federal, or local. You are still required to comply with all other applicable laws.

You are responsible for the actions of contractors, agents, or other persons who perform work to accomplish the approved project. For any activity that significantly deviates from the approved plan, you shall notify the Habitat Section and obtain written approval in the form of a permit amendment before beginning the activity. Any action that increases the project's overall scope or that negates, alters, or minimizes the intent or effectiveness of any provision contained in this permit will be deemed a significant deviation from the approved plan. The final determination as to the significance of any deviation and the need for a permit amendment is a Habitat Section responsibility. Therefore, we recommend you consult the Habitat Section before considering any deviation from the approved plan.

You shall give an authorized representative of the state free and unobstructed access to the permit site, at safe and reasonable times, for the purpose of inspecting or monitoring compliance with any provision of this permit. You shall furnish whatever assistance and information the authorized representative reasonably requires for monitoring and inspection purposes.

In addition to the penalties provided by law, this permit may be terminated or revoked for failure to comply with its provisions or failure to comply with applicable statutes and regulations. You shall mitigate any adverse effect upon fish or wildlife, their habitats, or any restriction or interference with public use that the commissioner determines was a direct result of your failure to comply with this permit or any applicable law.

You shall indemnify, save harmless, and defend the department, its agents, and its employees from any and all claims, actions, or liabilities for injuries or damages sustained by any person or property arising

directly or indirectly from permitted activities or your performance under this permit. However, this provision has no effect if, and only if, the sole proximate cause of the injury is the department's negligence.

You may appeal this permit decision relating to AS 16.05.871 in accordance with the provisions of AS 44.62.330-630.

If you have any questions, please call the Palmer Habitat Section at (907) 861-3200.

Sincerely,

Doug Vincent-Lang, Commissioner
