

PROPOSAL 132 – 5 AAC 21.200. Fishing districts, subdistricts, and sections. Move the southwestern-most point of the Expanded Kasilof Section 1.2 nm west so it aligns with the northwestern-most point of the Expanded Anchor Point Section, as follows:

5 AAC 21.200(b)(2)(E)

Expanded Kasilof Section: all waters enclosed by a line from a point on the beach at 60°27.10' N lat., 151°16.94' W. long., west to a point at the Blanchard Line located at 60°27.10' N. lat., 151°33.76 W. long., south to a point located at 60°04.02'N lat., [151°46.60] **151°49.00'** W. long. and east to an ADF&G regulatory marker located at 60 04 .02' N. lat., 151 38.90'W. long.;

What is the issue you would like the board to address and why? When the BOF created a new Anchor Point Section at the 2014 UCI meeting, the NW point was established 1.2 nm to the west of the current SW point of the Kasilof Expanded Section. The new regulation created a 1.2 mile discrepancy when describing what was supposed to be a common point for both the SW point of the Kasilof Expanded and NW point of the Anchor Point Sections. We request a common coordinated point of 151°49.00' West longitude be used to describe the westward point where these two sections join up against each other along the 60°04.02 North latitude line.

The 1.2 nm discrepancy in the sections boundary line creates compliance and law enforcement issues. There are no salmon conservation or allocation effects if this regulation is changed.

PROPOSED BY: United Cook Inlet Drift Association (HQ-F16-007)
