

**PROPOSAL 106**

**5 AAC 01.270. Lawful gear and gear specifications and operation.**

Allow set gillnets to be operated for subsistence purposes within 50 feet of each other in that portion of the Kuskokwim River drainage from the north end of Eek Island upstream to the mouth of the Kolmakoff River, as follows:

In that portion of the Kuskokwim River drainage from the north end of Eek Island upstream to the mouth of the Kolmakoff River, no part of the set gillnet located within a tributary to the Kuskokwim River may be set or operated within 50 feet of any part of another set gillnet.

**What is the issue you would like the board to address and why?** All throughout the Kuskokwim River drainage there are a few eddies to set gillnets during spring to fall and under ice set nets during winter months where we see nets set less than the current regulation. People along the Kuskokwim River drainages have set gillnets in eddies in spring to fall and under ice gear in winter which are usually less than 150 feet in length. In order to correct this, the department must adopt a revised regulation that meets the needs of set netters throughout the year.

**PROPOSED BY:** Organized Village of Kwethluk
