

PROPOSAL 153

5 AAC 15.357. Chignik Area Salmon Management Plan.

Prohibit commercial fishing for salmon in the Perryville District and Mitrofanina Section when the Southeastern District is closed to commercial fishing for salmon, as follows:

When the SEDM section of the south peninsula is closed because of escapement concerns, the Mitrofanina section and Perryville district will close to commercial salmon fishing until the SEDM reaches its escapement goals.

What is the issue you would like the board to address and why? In recent years the SEDM has not opened in late July and August until escapement levels had been reached. At the same time the Mitrofanina and Perryville districts were permitted to remain open while they were targeting west-bound fish.
