

**PROPOSAL 209**

**5 AAC 47.021. Special provisions for seasons, bag, possession, annual, and size limits, and methods and means for the salt waters of the Southeast Alaska Area.**

Reduce the number of crab pots allowed and the Dungeness crab bag limit for nonresident anglers in District 3, as follows:

Reduce non-resident crab pot in-possession limit in District 3 to four (4) pots per vessel, two (2) crab pots per person with a daily harvest limit of two (2) legal sized male crab per day.

**What is the issue you would like the board to address and why?** Harvest of shellfish has become a challenge for rural Alaska residents. Reducing non-resident crab pot in-possession limit and harvest limit will help increase biomass for sustained harvesting for Alaskan Residents.

**PROPOSED BY:** Klawock Fish and Game Advisory Committee (HQ-F20-057)
