

**PROPOSAL 213**

**5 AAC 32.052. Dungeness crab pot gear storage requirements.**

Extend pot storage allowance after fishery closure, as follows:

5 AAC 32.052(2). Amend language to allow a minimum 7 days storage following the non-emergency closure of Districts 3-16.

**What is the issue you would like the board to address and why?** As written this regulation provides 7 days in water storage following the closure of the summer crab season in Area A but only 3 December days following the closure of the fall season in 14 of the 16 districts of Area A.

**PROPOSED BY:** Peter Roddy
