

PROPOSAL 146

5 AAC 09.366. Post-June Salmon Management Plan for the South Alaska Peninsula.

Amend the *Post-June Salmon Management for the South Alaska Peninsula* to increase commercial salmon fishing periods, as follows:

Change the current management plan after the 10th of July so each open period would be extended 24 hours and the time between each period is reduced by 24 hours until the end of July.

What is the issue you would like the board to address and why? The post June management plan in the Shumagin Islands is too restrictive after the 10th of July in terms of fishing time. Run timing of fish have shifted to earlier in the season than when the current plan was adopted. Both the Chignik's first run of fish is over and the Bristol Bay fish have passed through this area. Loss of income to our community is devastating.
