

PROPOSAL 23

5 AAC 67.022. Special provisions for seasons, bag, possession, and size limits, and methods and means in the Bristol Bay Area.

Allow retention of king salmon less than 20 inches in length in Big Creek, as follows:

I would propose that sport fisherman be allowed to retain any jack king salmon caught in Big Creek, any king salmon less than 20 inches. Jack salmon do not spawn so there would not be any risk to the salmon population to retain these fish up big creek.

What is the issue you would like the board to address and why? I would like the fishing regulations for the Naknek river drainage in Bristol Bay changed. specifically the regulations on Big creek and not being able to retain any king salmon on big creek.
