

PROPOSAL 118

5AAC 21.365. Kasilof River Salmon Management Plan.

Reduce the Kasilof River sockeye salmon optimal escapement goal as follows:

The escapement goal for Kasilof River sockeye will be 150,000 to 250,000, regardless of run strength. Meeting this escapement goal will take precedence over all other management objectives.

What is the issue you would like the board to address and why? In order to meet national standards set by Magnuson-Stevens Act, escapement goals for the Kasilof River sockeye have to be set to achieve Maximum Sustained Yield (MSY).
