

North Gulf Coast (1 proposal)

PROPOSAL 12

5 AAC 58.065. North Gulf Coast King Salmon Sport Fishery Management Plan.

Modify the North Gulf Coast King Salmon Sport Fishery Management Plan, as follows:

Proposed Change:

(4) the bag and possession limit for king salmon is two fish, with no size limit except for May 15 -July 31 when bag and possession limit for king salmon is one fish, with no size limit;

(5) For summer fisheries (April 1-August 31):

20 inches or longer: There is a combined annual catch limit of 5 king salmon 20 inches or longer. A king salmon of 20 inches or longer that is removed from salt water must be retained and becomes a part of the bag limit for of the person who originally hooked the fish. You must not remove a king salmon of 20 inches or longer from the water before releasing it.

What is the issue you would like the board to address and why? The North Gulf Coast salt water king salmon FMP currently has daily-bag (2) in the unguided and guided-recreational sector that are not in alignment with the Lower Cook Inlet’s king salmon FMP.

Lower Cook Inlet unguided and guided-recreational fisheries both have restricted limits for the 2023 season based on low expected returns of king salmon in the Upper Cook Inlet. East-side Cook Inlet set net fisheries are set to be closed for the 2023 season based on expected low king salmon returns. The burden of conservation for Upper Cook Inlet king salmon should be equitable in unguided and guided-recreational fisheries which have similar genetic mixing to protect the stock and to return it to a state where all effected fisheries may maintain access and viability.
