

## Support Proposal 105

Bear snaring, along with all the other horrors inflicted on our wildlife by our government's various killing agencies, is archaic, gruesome, monumentally cruel and irresponsible.

But the BOG already knows this. They simply don't care. I have to believe that they discuss ways to make it more horrific for our wildlife as the news regarding our wildlife grows worse each year.

They should be criminally charged for contributing to speeding up the destruction of our planet, our home. Thankfully more people are becoming more aware of their sickening role in the mass carnage and violence and cannot hide their true mission as easily.

What ridiculous reply will they come up with for all the reasons bear snaring should not happen. What will they tell the owner of a family pet who will be caught in one of their traps? What new lies and propaganda will they spew to justify the wildlife holocaust?

Their arrogant and perverted manipulation of our wildlife has and will continue to do great harm to all species, including our own.
