

Hello

I am requesting a **Vote "Yes" on Proposal 105**. Bears represent enormous eco-tourism value. People come to Alaska with the sole purpose of seeing bears. Furthermore, bear snaring is a barbaric practice and should be eliminated in a civilized society.

I am also requesting a **Vote "Yes" on Proposal 86**. Uncontrolled trapping has decimated the wolf population. Wolves are a HUGE eco-tourism draw and bring an enormous amount of money into the state. Indiscriminate trapping of wolves can decimate and disperse packs as they are a highly social unit dependent on each other where each member has a specific purpose.

Thank you for your time.

Melanie Weberg
