

PROPOSAL 120

5 AAC 92.450. Description of game management units.

Adjust the boundary between Unit 25C and D as follows:

Unit 25C: The drainages into the south bank of the Yukon River upstream from Circle to the Unit 20E boundary, the Birch Creek drainage upstream from the Steese Highway bridge (MP 147) and then following the Steese Highway to the northeast staying on the north side of the road from the Steese Bridge at MP 147 to Circle; the Preacher Creek drainage upstream from and including the Rock Creek drainage, and the Beaver Creek drainage upstream from and including the Moose Creek drainage.

What is the issue you would like the board to address and why? This realignment of the 25C/D boundary would reduce confusion on where the boundary is located as you drive between Central and Circle. The suggested fix would move the boundary to the road between Birch Creek and Circle, which would help to know exactly where the game Units start and end.

Did you develop your proposal in coordination with others, or with your local fish and game advisory committee?
