

PROPOSAL 128

5 AAC 92.080. Unlawful methods of taking game; exceptions.

Allow the use of electronically enhanced night vision and thermal optics taking furbearers statewide as follows:

Proposed solution:

Night vision and thermal optics may be used to take fur bearing animals with a trapping license during open trapping seasons in all game management units and sub-units.

What is the issue you would like the board to address and why? The taking of furbearing animals with night vision or thermal devices should be allowed with a trapping license in all game management units not just a select few that was permitted in earlier game review board.

Did you develop your proposal in coordination with others, or with your local fish and game advisory committee? Self-developed.
